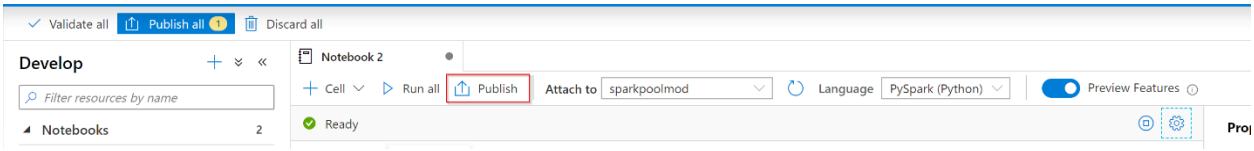
Save Spark notebooks

Note:

You are not required to complete the processes, tasks, activities, or steps presented in this example. The various samples provided are for illustrative purposes only and it's likely that if you try this out you will encounter issues in your system.

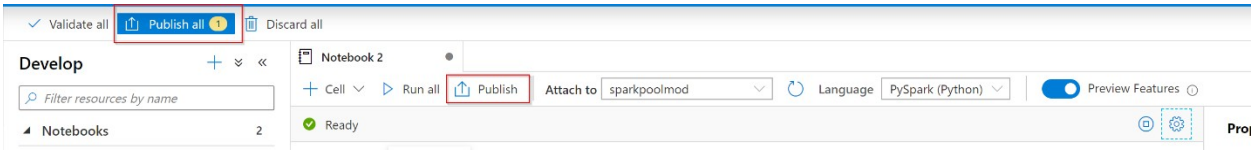
Once you have completed your work in the notebooks, you can save either a single notebook, or all of notebooks that you've created, within Azure Synapse Studio notebooks.

- To save changes you made to a single notebook, select the **Publish** button on the notebook command bar.



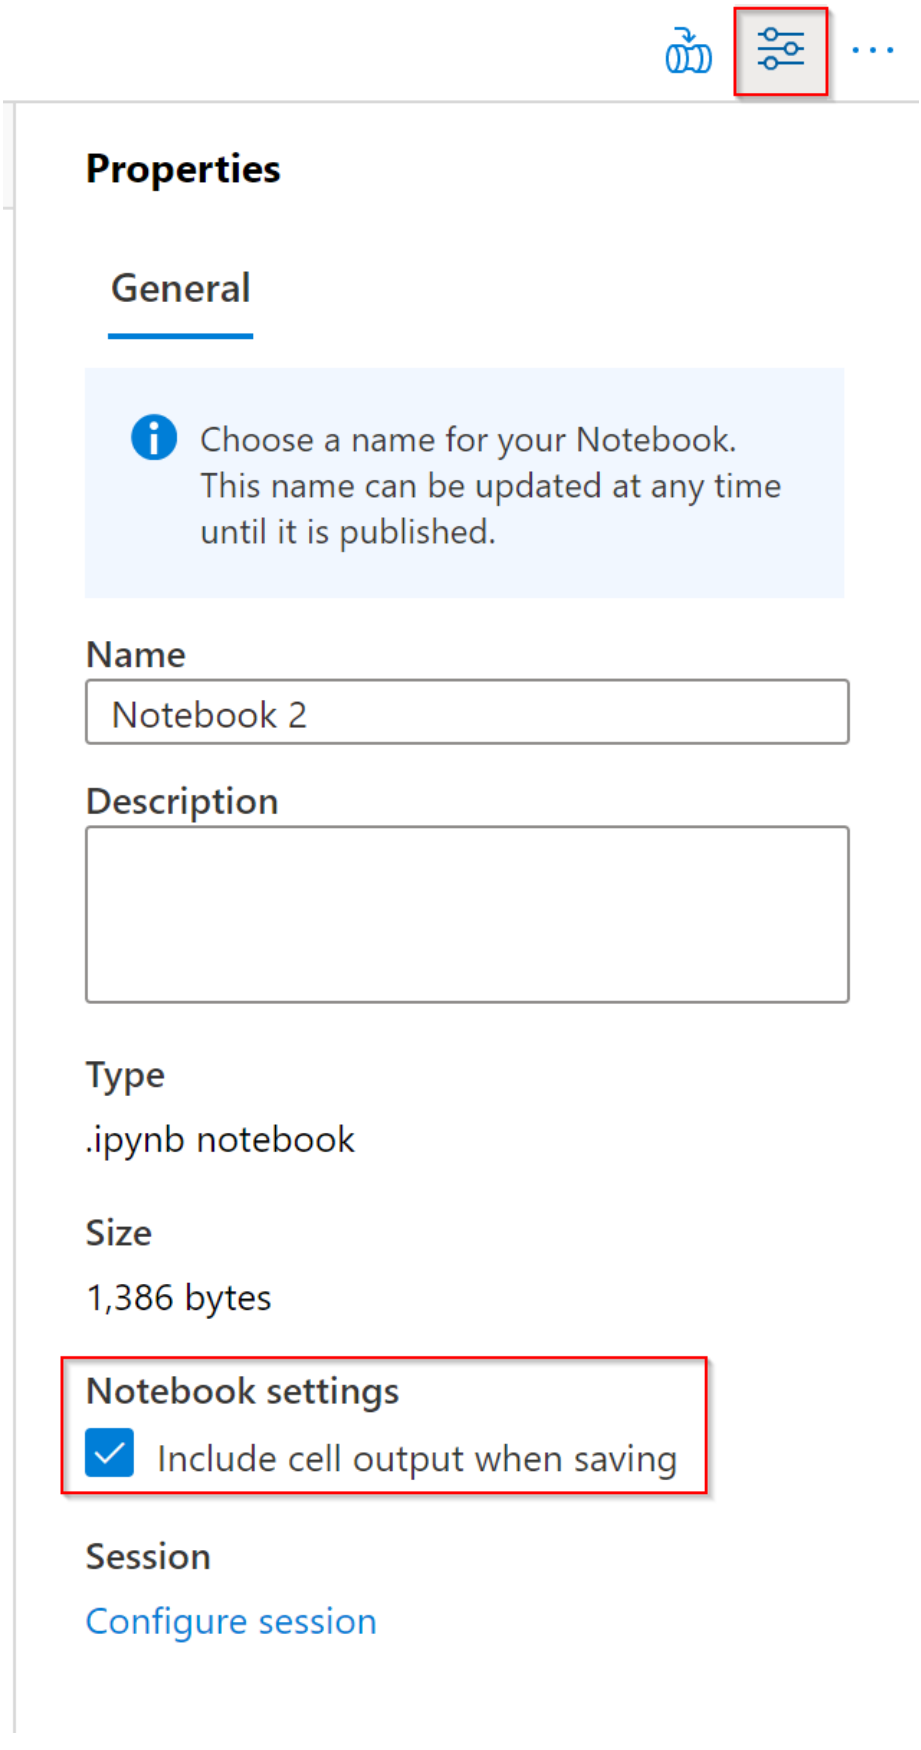
Publish Notebook

- To save all notebooks in your workspace, select the **Publish all** button on the workspace command bar.



Save all notebooks through Publish All

In the notebook properties, you can configure whether or not to include the cell output when saving.



Properties
General
Choose a name for your Notebook. This name can be updated at any time until it is published.
Name
Notebook 2
Description
